### AX1 LCD Keypad

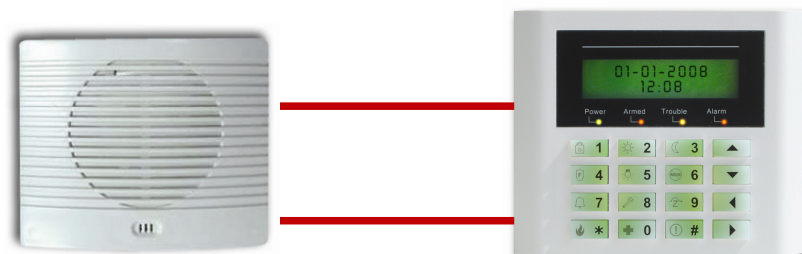

- The LCD keypad is also known as the system's wired panel for system automation and security Arming.
- It's a 2½ Inch x 16 LCD display.
- It has a yellow backlight to brighten up the LCD screen and the soft rubber keypad.
- The benefits of this keypad include:
  - Robustness;
  - Ergonomic;
  - System is menu-driven (user-friendly);
  - Simplicity.
- There is an optional external voice module that can be added on for voice-driven menu and alerts.
- The system can support up to 8 LCD keypads and can be installed and extended as far as the RS485 standard allows.

### AX1 Keypad Voice Module & Speaker

- The LCD keypad voice module & speaker comes under the same set as both of them are hardwired
- The keypad voice module is to be plugged inside the LCD keypad through its designated connector.
- The external keypad voice speaker is measured at 37mm x 25mm with an input power of 0.25W / Max 0.5W.

Wiring Connections between LCD keypad, Voice Speaker & Voice Module
