AX1 Telephone Voice Module

- This module enables the presence of the interactive pre-programmed voice to telephone or hand phone control.
- It comes as a separate module and it is plugged into the main panel.
- It's beneficial to user as a guidance to the controls and operations of the alarm system.

AX1 Zone Expander

- As the name implies, the Zone Expander expands up to 32 zones maximum.
- Each module supports 8 zones thus only maximum 3 Modules can be used.
- This expander is connected to the main panel via its proprietary protocol and the data communication length complies with the RS485 protocol.
- Zone types supported include Normally-Open (NO), Normally-Closed (NC) and End-Of-Line (EOL).
- Each individual zone has customizable sensitivity for personal preferences.

AX1 IO Expander

- As the name implies, the IO Expander expands the automation to either the High Current Relay Module (with or without feedback) and/or the 2-G Switch Module.
- User has a selection of either a 4 or 8 automation points IO Expander up to max 32 automation points.
- The module acts as a gateway by sending out +12V_{DC} for automation and receiving +12V_{DC} for system feedback.
- This expander is also connected to the main panel via its proprietary protocol and the data communication length complies with the RS485 protocol.
