AX1 Avan Touch Keypad

The latest innovative keypad design incorporates the Capacitive Sensing Technique as a Human Interface Device (HID). Being the pioneer in this market, the touch panel gives an extra option over conventional LED and LCD keypads.

The Avan Touch keypad has the following features:

- A 4 Inch LCD keypad display with [2 x 16] Alphanumeric characters;
- It has selectable Blue or Amber Backlit Keys;
- The touch panel is made of polycarbonate due to its:
 - Clarity;
 - Lightness;
 - Break-resistance.
- A build-in voice speaker that can be disabled or enabled.
- It has 12 Numeric buttons (0 - 9, *, #) that correspond to a standard telephone/mobile phone keypad and 4 directional navigation keys for menu controls with extra slider functions;
- An internal buzzer to provide warning chime to alert any user upon system violation;
- Quick Easy menu access with 15 available fast keys.
